

Download & Install Windows on your Mac

Chrissy Willow Rothgeb | Cise-IT@jmu.edu | updated 2020-01-22

Download and License Windows

Windows is available to JMU students and faculty through Azure Dev Tools for Teaching:

<https://aka.ms/devtoolsforteaching>. Log in using your JMU or Dukes email address and password.

Once logged into Azure, click the link on the left for “Software”, type “windows 10 education” into the search field, and select “Windows 10 Education, Version...”. On the right, you will find a button to view the product key, and another to download Windows as an ISO. Please write down the product key as you will need this during installation.

The screenshot shows the Azure Dev Tools for Teaching interface. On the left, there is a navigation menu with options like Overview, Get started, Learning resources, Software, Learning, My account, and Need help?. The main area displays search results for 'windows 10 education'. A table lists two items, both 'Windows 10 Education, Version 1809 (Updated Sept 2018)'. The right-hand panel shows the details for the selected item, including the Windows logo, the product name, a detailed description of the multi-edition Consumer media, and system specifications: Operating System (Windows), Product language (English), and System (64 bit). At the bottom of the details panel, there are buttons for 'View Key', 'Download', and 'Cancel'.

Windows 10 Education, Version 1809 (Updated Sept 2018)

For this multi-edition Consumer media, use a product key specific to the edition in the list you want to activate. From the desktop, select the Start button > Settings > Update & Security > Activation. Select Change product key and enter your product key. If the key is valid, you'll be asked to confirm the edition change, and Windows then performs it for you. Windows 10 Professional, version 1709 or newer, will need to be installed before using the Windows 10 Pro for Workstations product key to activate the edition. Both Windows 10 Professional and Windows 10 Pro for Workstations product keys will activate Windows 10 Professional, version 1709 or newer media.

Install Windows through Boot Camp Assistant

Launch the Boot Camp Assistant app (found in Applications > Utilities) in order to install Windows on your Mac. Click the “choose...” button to select the Windows ISO you downloaded, and drag the slider to select the size of partition given to Windows. For Engineering, we recommend allocating no less than 128 GB.

Detailed instructions for Boot Camp are available at <https://support.apple.com/en-us/HT201468>.

Support

If you have difficulty installing or licensing Windows, please email Cise-IT@jmu.edu for support.
